

Pavel Ravits

React web developer

Background

I am a Full Stack web developer that specializes in **Front-End and React**.

Have been developing for **3 years in Web and React ecosystem**, since switching from Electronics Engineering and Embedded.

Writing software since age 13.

A little about my coding practice

- Optimize, refactor and practice single source of truth
- Separate Business logic from the view
- Use latest javascript/typescript esnext
- Learning and expanding knowledge, trying new things, keeping up with the advancements.
- Passionate about web development
- Great as a solo and in a team.
- Great at solving problems by myself but easily ask for help.

Selected Experience

2017 - today **React Full Stack Web Developer**
Freelance at Xlucidity

- Full Stack desktop and mobile Apps built from requirements to production.
- **Next.js SSR and React single-page applications** using latest CSS-IN-JS technology
- React Native mobile apps using Javascript, Typescript, and Mobx.
- **Worked in a remote team**, using Clojurescript, Javascript, Node.js, AWS Lambda, Dynamodb, Postgresql.
- IOT - internet-connected devices
- *More details on my website*

2003 - 2016 **Software & Electronics engineer**
At Syqe Medical / Startups / Freelance

- Embedded Software - C • Audio and IOT and
- Board design (Altium) medical applications
- Digital and analog • Layout

Education

1996 - 2000 **BA.Sc. Electronics, Computing and Communication Engineering**
Technion - Israel Institute of technology
